```

1 library(htr)
2
3 # 1. Find OAuth settings for github:
4 #   http://developer.github.com/v3/oauth/
5 oauth_endpoints("github")
6
7 # 2. To make your own application, register at
8 #   https://github.com/settings/developers. Use any URL for the homepage URL
9 #   (http://github.com is fine) and http://localhost:1410 as the callback url
10 #
11 #   Replace your key and secret below.
12 myapp <- oauth_app("github",
13   key = "56b637a5baffac62cad9",
14   secret = "8e107541ae1791259e9987d544ca568633da2ebf")
15
16 # 3. Get OAuth credentials
17 github_token <- oauth2.0_token(oauth_endpoints("github"), myapp)
18
19 # 4. Use API
20 gtoken <- config(token = github_token)
21 req <- GET("https://api.github.com/rate_limit", gtoken)
22 stop_for_status(req)
23 content(req)
24
25 # OR:
26 req <- with_config(gtoken, GET("https://api.github.com/rate_limit"))
27 stop_for_status(req)
28 content(req)

```
